PROFILE

Computer Science graduate with strong knowledge in **Core Java, OOPS, Collections Framework, JDBC, Servlets, SQL, and Web Technologies (HTML, CSS, JavaScript)**. Experienced in building full-stack web applications and AI-based solutions. Passionate about backend development and problem-solving.

SKILLS

Programming: Java, JavaScript
Backend: Servlets, JDBC
Web Technologies: HTML5, CSS3
Database: SQL

EDUCATION

B.E.Computer Science and Engineering, <i>Mahendra Engineering College, CGPA: 7.60</i>	2021 – 2025
Higher Secondary, Tagore Matric and Higher Secondary School, 75%	2020 – 2021
SSLC, Tagore Matric and Higher Secondary School, 69%	2018 – 2019

INTERNSHIP

Infosys Springboard Virtual Internship - Intern • Developed an AI-based Image Captioning application using Python and Deep Learning (CNN + LSTM models) . • Integrated Vision-Language models for automated caption generation. • Optimized model performance and improved caption accuracy. • Performed model testing and validation using Jupyter Notebook .	05/2024 – 07/2024
--	-------------------

PROJECTS

Weather WebApp

- Tech Stacks: HTML, CSS, JavaScript
- Integrated real-time weather API using **Fetch API and asynchronous JavaScript (async/await)**.
- Handled API responses and error handling efficiently.

Salon Management System

- Tech Stacks: Java, SQL, HTML, CSS, JavaScript
- Developed a full-stack web application to manage appointments, customers, and services.
- Implemented CRUD operations using Java (Servlet) with JDBC and MySQL.

CERTIFICATES

- Image Captioning - Infosys Springboard
- AWS Academy Graduate - AWS Academy Cloud Foundations.
